BIO2RDF

Linked Data for the Life Sciences

chemicals/drugs/formulations,
genomes/genes/proteins, domains
Interactions, complexes & pathways
animal models and phenotypes
Disease, genetic markers, treatments
Terminologies & publications

121

~11B interlinked statements from **35 bio-datasets**

- Providing Linked Data since 2005
- Free and open source
- Uses Semantic Web standards
- Pre-computed summary statistics
- Partnerships with EBI, SIB, NCBI, DBCLS, NCBO, OpenPHACTS, and many others
